

**DANGER**

Variations in chemical behavior during handling due to factors such as temperature, pressure and concentration can cause equipment to fail even though it passed an initial test.

SERIOUS INJURY MAY RESULT!

Use suitable guards and/or personal protection when handling chemicals.

**WARNING**

The information in this chart has been supplied by reputable sources and is to be used ONLY as a guide in selecting equipment for appropriate compatibility. Before permanent installation test the equipment with the chemicals and under the specific conditions of your application.

Ratings of chemical behavior listed in this chart apply to a 48-hr exposed period. There is no knowledge of possible effects beyond this period. This does not warrant (neither express nor implied) that the information in this chart is accurate or complete or that any material is suitable for any purpose.
